Projects

A Web-Based Medicine Factory Management System

github.com/khanshamim8134/KhanPharm 📄

Summary: Designed and developed a responsive web-based system to manage medicine production, inventory, and staff operations efficiently. Implemented secure authentication, real-time data handling, and automated record management for factory workflow optimization. The goal is to ensure real-time monitoring, data accuracy, faster decision-making, and improved productivity in pharmaceutical factory operations.

PIANO

github.com/khanshamim8134/PIANO

- This PIANO project is a Java-based virtual piano application created using the Swing framework. It provides a graphical interface resembling a piano keyboard, allowing users to play notes by clicking buttons. Each button corresponds to a piano key and triggers a WAV audio file for the respective note using the javax.sound.sampled library.
- Tools Used: JAVA, Netbeans, GUI, J-frames, Java-Swing framework.
